Send resume and statement of interest to: Human Resources (jobs@sitscape.com)

Job Type: Full-time

What we do: Sitscape has created an award-winning no-code software development tool which allows users to rapidly build full-scale applications without the need to write a single line of code. Our software's strength is that it supports the same level of abstraction as writing code, yet is developed in a fraction of the time without the need to maintain a massive code-base.

Job Description: We are seeking a multiple-level Technical Consultant/Solution Architect (Associate, Senior, and Director) to join our Professional Services team. In this role you will engage with our customers and work with our Professional Services team to develop software solutions using our award-winning software platform. Your primary responsibility will be to create and implement these innovative solutions to meet our customer requirements. You will frequently engage with our DoD or commercial customers directly to define use case requirements, and work with our talented technical team to implement high-valued business use cases.

You will work closely with customers to learn and understand their business life cycles and relevant domain knowledge in order to implement high-value use cases to help achieve their overall business objectives. Once that is clear, you will design, implement and demonstrate solutions with SitScape's no-coding/low-coding software platform, conduct cordial and productive teamwork communications with both customers and SitScape's engineer team,

What we are looking for:

- B.S./B.A. in Engineering, Computer Science or related field/degree
- 3+ years of experience with hands-on software development or technical consulting
- Experience with Web technologies, programming or scripting languages such as JavaScript and PHP
- Experience with relational databases and SQL
- Experience developing integrations using APIs
- Experience with agile software development practices
- Linux Sys admin skill is a plus
- Drag and drop GUI expertise for robust application design
- Solution architecture experience a plus
- Ability to translate business logic to platform architecture and performance
- Experience performing live interactive demos with customers (virtual or on-site)
- Willingness to travel occasionally
- Actively monitor industry innovations and best practices, and interact with SitScape colleagues for learning, sharing, training and discussion of improvements for SitScape products
- Demonstrate quick and passionate learning of innovative technologies as an agile and proactive problem solver, not as a passive task-taker,

About Us:

SitScape is an enterprise software product company headquartered in Tyson's Corner, Virginia, next to Washington D.C. SitScape was founded with a single vision - empower business and mission users to talk to their data via visual **correlation** and **analytics,** and naturally collaborate in their situational context. SitScape is the leader in collaborative User-Defined-Operating-Picture (UDOP) Situational Awareness solutions with our award-winning Digital Enterprise Enablement Platform (DEEP) software.

It enables new digital transformations with on-demand **Situational Awareness**; agile **Big Data Visualization,** rapid **Visual Data Discovery**; powerful **Data Correlation, Analytics and Machine Learning**; drag-and-drop for **Process and Workflow Automation**; no-code Enterprise Application Assembling; Live Monitoring; **Real-time Contextual Collaboration** and secure Information **Sharing**. All performed in minutes in a Web browser with zero programming.

SitScape is an equal opportunity employer.
