Send resume and statement of interest to: Human Resources (jobs@sitscape.com)

Job Type: Full-time

What we do: SitScape has created an award-winning no-code software development tool which allows users to rapidly build full-scale applications without the need to write a single line of code. Our software's strength is that it supports the same level of abstraction as writing code, yet is developed in a fraction of the time without the need to maintain a massive code-base.

Job Description: We are looking for a UI Designer to join our product development team. In this role, you will be providing digital creative solutions to support our award-winning software platform. The goal of this role is to merge business, technology and user requirements into design concepts with the creation of prototypes, mock-ups, and layouts. In more detail, you will be applying and designing interactive web apps which use drag & drop widgets, dynamic data flow visualization, and adaptive/responsive styling throughout the app.

Some of our high-level aims for this year include redesigning the look and feel of our development platform to better reflect the market's expectations of what an advanced technology should look like - You will directly impact this!

What we are looking for:

- 3+ years of experience with hands-on UX/UI design work
- B.S./B.A. in Visual Arts, Design, Engineering, Computer Science or related field/degree
- Help identify and solve usability and UI design problems
- Strong skills working with wireframing tools such as Sketch or Figma
- Basic familiarity of Web technologies (HTML5 DOM, CSS, JavaScript, & PHP)
- Keep up to date with industry trends / practices in UX/UI design across digital platforms
- Collaborate to deliver work in a timely manner that meets/exceeds expectations
- Drive excellence through focusing on details such as style, layouts, fonts, and colors
- Ensure quality and brand standards are maintained throughout the creative process

About Us:

SitScape is an enterprise software product company headquartered in Tyson's Corner, Virginia, next to Washington D.C. SitScape was founded with a single vision - empower business and mission users to talk to their data via visual correlation and analytics, and naturally collaborate in their situational context. SitScape is the leader in collaborative User-Defined-Operating-Picture (UDOP) Situational Awareness solutions with our award-winning Digital Enterprise Enablement Platform (DEEP) software.

It enables new digital transformations with on-demand Situational Awareness; agile Big Data Visualization, rapid Visual Data Discovery; powerful Data Correlation, Analytics and Machine Learning; drag-and-drop for Process and Workflow Automation; no-code Enterprise Application Assembling; Live Monitoring; Real-time Contextual Collaboration and secure Information Sharing. All performed in minutes in a Web browser with zero programming.

SitScape is an equal opportunity employer.
