Trusted by the Largest Enterprises in Airline, Insurance, Banking and Military

SitScape brings agile data analytics, holistic operational visibility and optimized process automation from disparate sources without coding – with actionable operational intelligence, smart human-machine teaming, dynamic collaboration and automated data and process flows at the enterprise scale.

Enable Smart Mission-Critical Digital Operations with:

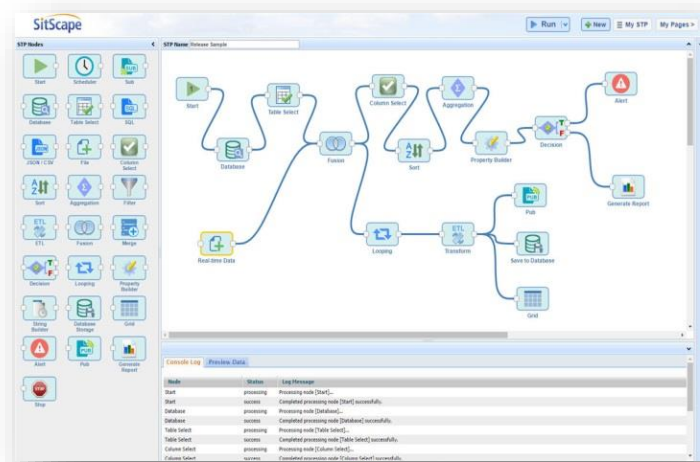

1. Data-driven, analytics-powered, process-oriented, continuous performance visibility and insight
2. 1-click generation of user-defined dashboard, KPIs and reports with Actionable Intelligence
3. Optimize and automate data processing flows and enable no-coding new enterprise apps rapidly
4. Dynamic collaboration and secure information sharing
5. Advanced security, governance and interoperability
6. Auto detect anomalies, risks and trigger actions

“SitScape has generated incredible excitement in government and Fortune 100 companies”

Patented and Differentiated Technologies:

1. A plug-and-play multi-source **data correlation fabric engine**
2. **Straight-Through-Processing (STP) engine** for data flow and process definition & automation
3. A **browser-based** visual environment for self-service **visual data analytics and discovery** and **creating new application user interfaces**
4. A Web-based **dynamic collaboration** and **secure information sharing** environment
