Why SitScape?

- Highly innovative and award-winning enterprise software product company
- Opportunity of working alongside top talent
- Highly collaborative environment to learn the most advanced technologies
- High growth, profitable business - great career growth opportunity
- Top pay in the industry with significant performance bonus awards
- Very stable with existing long-term contracts with world's largest customers
- Great benefits on health insurance, 401K match, PTO etc.
- Flexible working environment with remote working option
- In-house training opportunities from other experts

Job Description:

We are looking for a Senior UX/UI Designer to join our product development team. In this role, you will be providing digital creative solutions to support our award-winning software platform. The goal of this role is to merge business, technology and user requirements into design concepts with the creation of prototypes, mock-ups, and layouts. In this role you will act as the design discipline lead on multidisciplinary teams of researchers, technologist and engagement team members. You will create as well as translate schematic wireframes to high fidelity mockups and work with developers to create stunning software platform. In more detail you will be applying and designing interactive web apps which use drag & drop widgets, dynamic data visualization, and adaptive/responsive styling throughout the software platform.

Some of our high-level aims for this year include redesigning the look and feel of our no-code software platform – You will directly impact this!

Background and Skills Requirements:

- 5+ years of experience with hands-on UX/UI design work
- B.S./B.A. in Visual Arts, Design, Engineering, Computer Science or related field/degree
- Help identify and solve usability and UI design problems
- Strong skills working with wireframing tools such as Sketch or Figma
- Experience with Adobe Creative Suite tools, such as InDesign, Illustrator, or Photoshop

- Proficient with Web technologies (HTML5, DOM, CSS, JavaScript, & PHP)
- Keep up to date with industry trends/practices in UX/UI design across digital platforms
- Drive excellence through focusing on detail such as style, layouts, fonts, and colors
- Experience in design UI/UX for business software and applications
- Past tracking record of leading successful UI/UX design work for web-based software
- Good communication and collaboration skills
- Good team leadership skills

Preferred:

- Familiar with JavaScript, JSON and PHP and experience working with software developers
- Willingness and ability to learn new software and technologies quickly
- Experience with data visualization
- Detail-oriented
- Collaborate to deliver work in a timely manner that meets/exceeds expectations
- Good team working skills
- Excellent technical and problem-solving skills
- Self-motivated, work in agile/fast paced environment, keen to help others, and always looking for opportunities to bring your best game to the job every day
- Proactive and take initiative
- Actively monitor industry innovations and best practices, and is proactive in interacting with colleagues for continuous learning, idea sharing, training and discussion for improvements
